

Sustainability Made Easy

Ask us about:

- ✓ Energy efficiency
- ✓ Blast freezing optimization
- ✓ Automated load control

Now you can	Reduce costs	Energy Intensity	Increase revenue
View all controllers in a common interface	●		
Optimize site energy costs	●	●	
Improve blast freezing cycle times and utilization rates	●	●	●
Shed load automatically — no more manual intervention!	●	●	●

A partnership between M&M Carnot / Logix and Industrial makes RCS and PC Monitor Enterprise data instantly available in Nsight, the leading Energy Intensity software platform from Industrial. Easily automate energy-intensive processes with either brand of installed facility system refrigeration controller.

- Minimal integration required – implement within minutes.
- Available on all new M&M Carnot and Logix controllers.
- Can be retrofitted on controllers made in the last 10 years.

Data available

Energy consumption • Zone temperatures • System pressures
Setpoints • Alarms • Equipment status
and much more!
